EXPERIENCE

Software Engineer

11/2023 - 03/2026

Milliman

Paris, France

- Designed and secured scalable **REST APIs** with **Node.js** and **MongoDB**, improving response times by **30%** and ensuring reliable data exchanges.
- Enhanced application security by implementing **Auth0**, role-based access control (**RBAC**), request validation, and centralized error handling.
- Optimized **Angular** and **TypeScript** applications, reducing memory usage and improving responsiveness for real-time user interactions.
- Developed backend services in **Python**, delivering scalable, reliable, and maintainable solutions for critical business processes.
- Built real-time collaborative features, improving synchronization and user experience.
- Automated **GitLab CI/CD** pipelines for **Microsoft Azure** using **Bash** and **Python**, reducing deployment times by **40%** and improving delivery efficiency.
- Maintained **90%+ unit test coverage**, contributing to higher software quality and a significant reduction in production issues.
- Collaborated in **Agile/Scrum** teams, participating in sprint planning, backlog refinement, code reviews, and continuous improvement initiatives.
- Tech Stack:** Node.js, Angular, TypeScript, MongoDB, Python, Bash scripting, GitLab CI/CD, Auth0, REST APIs, Linux, and Microsoft Azure.

Full-Stack Node.js Software Engineer Intern

04/2023 - 09/2023

Milliman

Paris, France

EDUCATION

Master's Degree in Computer Science – Information and Mobility Track: Programming, Algorithms for Internet, Distributed Computing, and Systems (IMPAIRS)

09/2022 - 09/2023

Paris City University

Paris, France

Engineering Degree in Telecommunications – Specialization in Computer Science and Networks

09/2016 - 09/2021

National Higher School of Telecommunications and Information and Communication Technologies (ENSTIC)

Oran, Algeria

PROJECTS

Wikipedia Search Engine Built from Scratch

Developed a Wikipedia search engine using Java and Python, implementing text preprocessing, lemmatization, TF-IDF ranking, PageRank, and query optimization to improve search relevance.

Tech Stack: Java and Python.

github.com/yacineak97/wikipedia-search-engine

Secure P2P System Based on Merkle Trees

Designed and implemented a secure peer-to-peer synchronization system using Merkle trees and cryptographic verification to ensure reliable and verifiable data exchanges.

Tech Stack: Go (Golang).

github.com/yacineak97/peer_to_peer

Staybit – Distributed Hotel Booking System • NestJS Microservices • GraphQL Federation • AWS EKS

Built a hotel booking platform based on a NestJS microservices architecture, integrating GraphQL Federation, Stripe, JWT, PostgreSQL, Docker, Kubernetes, Helm, and AWS EKS, ECR, EC2, CodeBuild, and CodePipeline.

Tech Stack: NestJS and TypeScript.

github.com/yacineak97/staybit

SUMMARY

Full-Stack Software Engineer specializing in Node.js, Angular, React, Python, and cloud technologies. Experienced in building scalable APIs, secure backend systems, and high-performance web applications. Strong foundation in software engineering, DevOps practices, and Agile delivery, with a proven ability to learn quickly and contribute effectively across the full development lifecycle.

LANGUAGES

English

C1

SKILLS

Backend:

Node.js, NestJS, Express.js, Python, RESTful APIs, GraphQL APIs, RPC, gRPC, Kafka, and Microservices.

Frontend:

Angular, React, and Next.js.

Databases:

MongoDB, PostgreSQL, and TypeORM.

DevOps & Tools:

Docker, Kubernetes, Linux, Bash Scripting, and Microsoft Azure.

Methodologies & Project Management:

Agile, Scrum, Kanban, and Scrumban.

PROJECTS

Reactive Movie Catalogue & Admin Dashboard

Developed and deployed a full-stack movie catalog on AWS EC2 using Meteor, React, TypeScript, and MongoDB Atlas, featuring authentication, search, filtering, and admin management tools.

github.com/yacineak97/cinevault

[View Live Project](#)

Secure JWT Authentication Platform

Built a secure authentication platform with Go, Gin, React, TypeScript, and PostgreSQL, implementing JWT authentication, HttpOnly refresh tokens, protected routes, and secure session management.

Tech Stack: Golang, React, and TypeScript.

github.com/yacineak97/AuthVault

My Developer Portfolio

Designed and developed a responsive developer portfolio with React, TypeScript, and Vite, showcasing projects, technical skills, CV access, and an integrated contact form.

Tech Stack: React and TypeScript.

github.com/yacineak97/yacineak97.github.io

[View Live Project](#)

Implementation and Comparison of Neo4j vs PostgreSQL on Netflix Data

Implemented a Netflix data analysis project with Neo4j and PostgreSQL, comparing graph and relational models for connected data, query performance, and relationship-based analytics.

github.com/yacineak97/neo4j-project

Beacon-Based Supermarket Management System

Developed an Android application and web platform leveraging Beacon technology for indoor positioning, using a microservices architecture to improve scalability, maintainability, and reliability.

Tech Stack: React, Node.js, and PostgreSQL.
