EXPERIENCE

Software Engineer

11/2023 - 03/2026

Milliman

Paris, France

- Developed and secured **high-performance REST APIs** using **Node.js** and **MongoDB**, **improving response speed by 30%** and **enhancing data exchange reliability**.
- Implemented **Auth0** authentication, role-based access control, request validation, and error handling to secure APIs.
- Designed dynamic web interfaces with **Angular** and **TypeScript**, optimizing memory consumption by 90% and ensuring smooth real-time rendering.
- Built robust backend services in **Python** and **C#**, ensuring **scalability and security for critical endpoints**.
- Developed real-time collaborative applications with **Meteor.js**, integrating reactive features to deliver a modern user experience.
- Automated **CI/CD pipelines on GitLab** for **Azure** deployments, **reducing production deployment time by 40%** through the integration of Bash and Python scripts.
- Continuously improved code quality with over **90% unit test coverage**, **reducing customer-reported bugs by 70%**.
- Worked within an **Agile (Scrum)** environment: **sprint** planning, participation in **daily meetings**, backlog grooming, and **code reviews** to deliver **high-value features efficiently**.
- Tech Stack** : Node.js, Angular, TypeScript, MongoDB, Python, C#, Meteor.js, Blaze.js, Mocha.js, Bash, GitLab CI/CD, Auth0, REST APIs, Linux, and Microsoft Azure.

Full-Stack Meteor.js / Node.js Software Engineer Intern

04/2023 - 09/2023

Milliman

Paris, France

EDUCATION

Master's Degree in Computer Science – Information and Mobility Track: Programming, Algorithms for Internet, Distributed Computing, and Systems (IMPAIRS)

09/2022 - 09/2023

Paris City University

Paris, France

State Engineer Degree in Telecommunications – Specialization in Computer Science and Networks

09/2016 - 09/2021

National Higher School of Telecommunications and Information and Communication Technologies (ENSTIC)

Oran, Algeria

PROJECTS

Wikipedia Search Engine Built from Scratch

Project focused on building an efficient Wikipedia search engine, optimizing search result relevance using TF-IDF, PageRank, and lemmatization.

Tech Stack: Java and Python.

github.com/yacineak97/wikipedia-search-engine

Secure P2P System Based on Merkle Trees

Designed a secure and efficient peer-to-peer system enabling reliable direct communications with data integrity verification, encryption, and optimized network flow management.

Tech Stack : Go (Golang).

github.com/yacineak97/peer_to_peer

Staybit – Distributed Hotel Booking System • NestJS Microservices • GraphQL Federation • AWS EKS

A production-grade hotel reservation platform built with NestJS microservices, GraphQL Federation, Stripe payments, JWT authentication, PostgreSQL, and cloud deployment on AWS EKS with Kubernetes and Helm.

Tech Stack : NestJS, ReactJS, and TypeScript.

github.com/yacineak97/staybit

SUMMARY

Passionate Full-Stack Software Engineer with expertise in Node.js, React.js, Angular, and Python, recognized for the ability to learn quickly and adapt to new technologies. With a collaborative and results-driven mindset, I contributed to the development of scalable, high-performance, and secure web solutions at Milliman.

LANGUAGES

English

C1

SKILLS

Backend :

Node.js, Nest.js, Express.js, Python, C#, Golang, Java, Meteor.js, RESTful API, GraphQL API, RPC, gRPC, Kafka, and Microservices.

Frontend :

Angular, React.js, Next.js, React Native, Redux, Blaze templates, Material-UI, and Bootstrap.

Databases :

MongoDB, MySQL, PostgreSQL, TypeORM, and Cassandra.

DevOps & Tools :

Docker, Kubernetes, Linux, Shell Scripting, and Microsoft Azure.

Methodologies & Project Management :

Agile, Scrum, Kanban, and Scrumban.

PROJECTS

Reactive Movie Catalogue & Admin Dashboard

Developed a full-stack personal film catalogue using Meteor, React, TypeScript, and MongoDB, featuring user authentication, admin-only film management, real-time search/filter/sort, detailed film pages, poster uploads, and reactive UI updates through Meteor publications.

github.com/yacineak97/cinevault

Production-Ready JWT Authentication Platform

A production-ready full-stack authentication system built with Go, Gin, React, TypeScript, and PostgreSQL, implementing secure JWT access tokens, HttpOnly refresh cookies, protected routes, silent session refresh, and HTTPS-based authentication flows.

Tech Stack : Golang, ReactJS, and TypeScript.

github.com/yacineak97/AuthVault

My Developer Portfolio

A responsive developer portfolio built with React, TypeScript, and Vite, showcasing projects, technical skills, CV download, smooth animations, and a contact form powered by EmailJS.

Tech Stack : ReactJS and TypeScript.

github.com/yacineak97/yacineak97.github.io

Implementation and Comparison of Neo4j vs PostgreSQL on Netflix Data

Implemented a Netflix graph database using Neo4j, analyzed performance compared to PostgreSQL, and explored data using Graph Data Science algorithms.

github.com/yacineak97/neo4j-project

Beacon-Based Supermarket Management System

Developed an Android application and a web platform integrating Beacon technology for indoor positioning, enhancing user experience and retail management. Designed a microservices-based architecture to ensure scalability, modularity, and maintainability.

Tech Stack: React.js, Node.js, and PostgreSQL.
